### Dufour 44 – Performance, Comfort and Sustainability

The Dufour 44 marks a new milestone in the evolution of the Dufour range: an elegant, spacious, and high-performing yacht designed to deliver maximum comfort both under sail and at anchor. With its modern hull and well-balanced sail plan, it ensures both power and helming pleasure while remaining accessible to all crews. Thanks to its generous, optimized interior volumes, the Dufour 44 offers a bright and welcoming layout, ideal for family cruises or sailing trips with friends. Available in several configurations, including 3- or 4-cabin versions, it features a spacious forward owner's cabin, ample storage, and excellent headroom that enhances the overall sense of space. Large hull and deck windows flood the interior with natural light, creating a warm and contemporary atmosphere. On deck, the Dufour 44 reflects all the brand's hallmarks: a vast and ergonomic cockpit, smooth and secure circulation on deck, and relaxation areas designed to maximize outdoor living. Its bowsprit, elegant design, and carefully thought-out deck layouts make the Dufour 44 as enjoyable to sail as it is to live aboard. This model is also available in an electric version, allowing for quieter, more environmentally friendly navigation with an eye to the future. The Dufour 44 thus establishes itself as the ideal yacht for those seeking the perfect balance between performance, premium comfort, and sustainable innovation—all true to the Dufour spirit.
