Description

SAFFIER SE 28 LEOPARD – New 2026 Model
Discover the latest flagship from Saffier Yachts: the SE 28 Leopard, an exceptional daysailer that redefines the standards of coastal sailing. With its completely redesigned hull featuring an inverted bow, it offers even faster and more responsive performance, both upwind and downwind.

PERFORMANCE & DESIGN Its modern lines, wide beam, and flat underwater hull deliver speed, stability, and control in all conditions. An enhanced feeling of control at the helm, with improved performance in choppy seas—this boat is built for demanding sailors who refuse to compromise on the pleasure of sailing.
HANDLING & ERGONOMICS All halyards, sheets, and trim lines run below deck and terminate directly in front of the helm station, for a clean cockpit and smooth sailing, even single-handed. The SE 28 comes standard with a tiller. A twin-wheel layout is available as an option—the smallest sailboat on the market to offer this configuration.
SAIL CHOICES Easily switch from comfort mode—self-tacking jib and Code Zero—to racing mode—genoa and gennaker—depending on the conditions and your mood.
ENGINE Two propulsion options: a quiet and environmentally friendly electric motor, standard equipment, or a diesel engine, available at the same price.
INTERIOR & COMFORT Despite its 8.40-meter hull, the SE 28 Leopard boasts an unprecedented interior volume for a daysailer. Four berths, a compact galley, and a bright living space make short stays on board ideal.
