DELTA POWERBOATS 72 coupé

## Description

---

The new Delta Powerboats 72 combines timeless craftsmanship with cutting-edge technology and performance. Developed in collaboration with Mannerfelt Design, featuring a durable carbon-fiber construction and user-friendly deck layouts, the 72 is designed to excel at large daytime parties as well as on longer voyages, offering unmatched cruising comfort, pace, and efficiency. Buyers will have the option to choose the powertrain between twin IPS-1350 inboard engines or quad V12-600 outboards. Whichever option is chosen, the 72 is designed to deliver a thrilling experience on the water, supported by generous storage space for water toys, a convertible lift platform, and a tender garage. The exterior deck areas feature several options for relaxation, offering comfortable outdoor seating for over twenty guests, as well as three different sun loungers distributed across the deck and roof. Below deck, the interior can accommodate eight guests in four cabins with private bathrooms, including a full-width master suite and a cabin for two crew members. This Delta 72 is newly available through ALL YACHT MC, the distributor for Delta Powerboats throughout France and Monaco.
