DELTA POWERBOATS 33 OPEN

Description

The Delta 33 Open embodies two decades of visionary Swedish engineering, combining sleek proportions with uncompromising performance and advanced marine technology. This newly available carbon fiber sport runabout showcases the partnership between Delta Powerboats and internationally renowned designer Ted Mannerfelt, delivering a distinctive luxury motor yacht that perfectly bridges day-boat agility with exhilarating offshore capability. Built using an advanced carbon fiber composite laminate with Divinycell foam core infusion technology, the Delta 33 achieves a remarkable dry displacement of just 3,800 kilograms while maintaining the structural rigidity and longevity expected of a premium European yacht. The hull design utilizes a deep-V configuration with a 24-degree transom deadrise and an innovative double-bottom geometry, engineered for superior seakeeping, fuel efficiency, and thrilling performance across varied Mediterranean sea states. The open cockpit layout, designed for a direct connection with the water, offers ideal versatility between sporty day outings and demanding coastal cruising. Every element - from handcrafted Scandinavian interior joinery to precision mechanical systems - reflects an uncompromising commitment to quality and craftsmanship that upholds Delta's reputation for excellence. This Delta 33 Open is newly available through ALL YACHT MC, distributor of Delta Powerboats across France and Monaco.
