DELTA POWERBOATS 33 COUPÉ

Description

The Delta 33 Coupe embodies two decades of visionary Swedish engineering, combining elegant proportions with uncompromising performance and advanced marine technology. This newly available sport coupe showcases Delta Powerboats' craftsmanship, delivering a distinctive luxury motor yacht that perfectly bridges Mediterranean cruising comfort with exhilarating offshore capability. Built using a vacuum-infused vinylester composite laminate with Divinycell foam core and carbon fiber-reinforced stringers, the Delta 33 Coupe achieves a dry displacement of just 4,500 kilograms (6,500 kilograms at maximum load) while maintaining the structural rigidity and longevity expected of a premium European yacht. Measuring 10.95 metres overall with a draft of just 0.95 metres, her deep-V hull design allows her to reach a top speed of 39 to 41 knots with a single Volvo Penta D6-440 engine, or in a twin D4-320 configuration, while maintaining an efficient cruising speed of 29 to 31 knots for a standard range of 340 nautical miles. Every element - from the satin-finish Scandinavian teak-style interior joinery to precision mechanical systems such as the bow thruster and Zipwake interceptors - reflects an uncompromising commitment to quality and craftsmanship that upholds Delta's reputation for excellence. CE Category B certified, this Delta 33 Coupe is newly available through ALL YACHT MC, distributor of Delta Powerboats across France and Monaco.
